thurther ports of the United States."

RAILWAYS AND TRAFFIC.

Henry V. Poor, whose manual of the railriads of the United States has been published
during sixters consecutive years, has just finished the introduction to his manual for 1883,
comples of which are supplied to this press. The last seconds in this country was made by the high it is presented. The statements, summed and not care ner were \$310.082.677. Of gross ripts \$202,140,775 were received from passent : 4. \$506,067,247 from freight, and 561,848,784 perhaps, for arriving at a sorrect answer to it.

Mr. Wit sand C. Gonant, n an article in the from miscel ansons sources. Gross sarnings Seprember anmher of the Centery Magazine, Stieppin to show that New York will be the fine megropolis of the world. He says, in the

Since 1819 a period of three years, there have

th opened in the United States 23,019 miles first-partial. The extent opened caring the While the cash cost of all the railroads conreq years 'probably has not exce from door of the world will open on the Atlantic ocean. That the great cosmetrapolis increase of liabilities over actual caperity and adaptation of the new contract, the dethors of the old, and the expansivement of the liberated forces" of Europe in the stima good and bad." Again: "In most of he general railried laws forbid she paid: but these are avoided by contracts by equently, be issued and sold in any and at any price, the ouly limit bei to the measure of a moderate day's ride, within which are the diffes of Bakimere, Philadelphia and New York. The first two of these sufer by

But to the credit of the railroads it is to be barragament. It is also remarked as an evriver with the Erit cana and the great lakes The is but a small Home however, compared Vibitor disease will proposed mainterreptedly thousand trains a day at this center." It is 00 ,000 miles of read.

In the New England states the ammber of passions of the New England states the ammber of passions of the new 1983 was six-

ngers transported during the year 1882 was sixtoen and three tenths times greater than the whole population of that section; is the middle group of states it was ten times; in the western as I five-tenths times greater. In the southern the number transported was actually in the population. Here as fact which

alle in the New England group was 1,107,045,-066, at a charge of 2.1 cents per mile; in the middle states group, 2,356,226,676, at a charge of 2.3 cents per male: u the spathern group, 19.577,836 at a charge of 2.6 cents nor mile; the western group, 2 708 268 607, at a charge er miles in the Papific group, 5,531,048,735 persons muved one mile, at a used freight statement is equally valua. ble and instructive. The number of tons transowted one mile on the railroads of New Engern group 2,048,978,971 tons, at a charge of 1.8 cents per ten per mile; an those of the western group, 30,133,946,667 sous, at a charge of 1.2 cents per tou per mile; on these of the Pacific alog 39 902 209 249 take moved one mile, at es tonnage of 1382 was 215,000,000,000-equal

but which surely will trouble teem in time to T are is no reason in the theory itself why come, manify, they have given a powerful impetus to the prohibition sentiment of the state, and have made it doubtful areasy whether that for them before our eyest, he are do not see ri and its purposes can be besten at the them, many persons doubt that they seem oc stage which it would not have gained on an in the doctrine an polating triumphthrough ordinary discussion of the subject in analy to Nantucket, formerly noted for its ten years. By the incolorous lawlessuess of wist subories, but now the theatre it very remarkable changes in the habite of hous. In this free which; movement, thousands who remarkable changes in the babits of heat. In sery self have been roused against it determined to see superfier the arrogance cannot be that island have been simplified to thange their habits. "The land, as one of our ex-

sour neutra. The man, has one of our ex-changes from which we gasher these facts says As time goes sailt shows from day to day and "no longer yields them care worms in suffion at cumulities, and they have grown 41red of week to week that, in the managenery and in-efficiency of the belorgraph service on the Poolic coast sorthers lines, there are depths below the manageners of the below the service of the ser cepths. Such treatment of the best state. In sea only of this food they are rapidly becoming. It is time the voke of our season of this food they are rapidly becoming the first time the voke of our season of the water. And the best of the water, and were raised with a volume of season first water this. Deangest the water this peange their heads below the surface and outed for each new York. The neglect that water this peange their heads below the surface and outed for each of the water that water the water that the peange their heads below the surface and outed for season with the best water that the same and outed for season with the peange of the composition with the peans of the peans of the composition with the peans of the composition with the peans of th ished, say two years hance. I is a niggardly policy, and it receives as it deserves the representant first are beginning to make their appearance."

The dispatch relating to the appointment of c or gh, we shall have a new breed of wild the inspace reating to the appearance of the state of the she well to the matter of remove of the Twenty-lived for the matter of remove and the Twenty-lived for the matter of remove and the secondary of war knows anything about it: It is not the cast thus fall, as the army transportation of the find the most ample illustrations of the country of the transfer that the Twenty-Brat will be sent cast thus fall, as the army transportation of the transfer the transfer the transfer that the transfer that the transfer the transfer that the transfer t ath at this discovery which this country
